Aric Allen

Senior Software Engineer II

"Be the change you want to see in the codebase"

Oakland, California · aric.allen2@gmail.com · github.com/aricallen · linkedin.com/in/aricallen2

+ Experience

Anthropic – Human Data Researcher (Contract) 2026-Present

- Benchmarked frontier vs. research models on software-engineering tasks
- Performed behavioral grading of AI grader models, scoring their evaluations across six axes
- Applied human-in-the-loop evaluation methods to assess model and meta-model outputs

dbt Labs – Senior Software Engineer II 2023-Present

- Led MCP Apps to GA – authored the RFC, shipped custom UI across the dbt platform, VS Code, and Claude Desktop
- Shipped dbt's Insights analysis agent to GA: streaming, tool calling, SQL execution
- Frontend lead for full-screen dev-agent workspace with inline diff and DAG review of AI edits
- Led React 19 + Compiler migration across six repos, cutting React rendering time by ~54%
- Key contributor to unifying five frontend apps into one monorepo; CDN-split editor core to fix chronic CI failures
- Built local-dev tooling collapsing the 15+ shared-package dev loop into a single step
- Core member of Frontend Guild – steward of shared component library and accessibility standards

Reddit – Full-Stack Software Engineer 2022-2023

- Implemented internal ad search platform enabling cross-team discovery and action on ad data
- Built BI-to-Ads data synchronization and scaled ad review microservices for new ad products

Sysdig – SE2, SE3, Tech Lead 2017-2022

- Migrated build pipeline from waterfall to CI/CD, tripling release velocity
- Migrated Ember codebase to React, TypeScript, React Testing Library and Webpack
- Mentored engineers through code reviews and weekly contributor syncs
- Partnered with product and design to rapidly prototype and adapt to evolving customer needs

Apple Inc. – Software Engineer 2015-2017

- Built web and iOS event-attendee systems used globally, with on-site iPad + QR check-in
- Delivered rapid prototypes of web applications to meet evolving requirements for individual events

+ Skills

Expert	TypeScript, JavaScript, React, Node.js, Express, HTML, CSS, Tailwind, React Testing Library, Cypress, Vite
Experienced	Next.js, MCP (apps, clients, servers), SQL/PostgreSQL, K8s, GHA, GraphQL, MongoDB, Docker, Python, Figma, Electron, Ember, Sass, Jest, Styled Components, shadcn, Vitest
Learning	Go, Rust, Data Science / Machine Learning

+ Highlights

- 10+ years of professional Front-End experience; 6+ years of professional Full-Stack experience
- Lead architect for design token pipeline from Figma to shared npm package enabling seamless rollout of dark mode, theming, and brand refresh across six repositories
- 650+ merged PRs across 17 repositories in 18 months – app UIs, shared packages, API gateway, telemetry, and infra
- Peer-recognized force multiplier – cross-team unblocking, DX tooling, and docs written for humans and AI agents
- Zero-to-one builder – stood up new apps and shared packages from scratch and carried them to production
- Authored testing guidelines and tooling adopted across 4 teams, raising coverage without blocking development

+ Education

Bachelor of Arts, Electronic Production & Design – Berklee College of Music 2008–2011
